GENIUS Act final rules due July 18 with \$5M capital floor

Six federal agencies are finalizing U.S. stablecoin rules requiring issuers like Stripe and Block to either raise \$5M in dedicated capital and charter a stablecoin bank, or exit the market.

Angel Investors Network

EU's MiCA transitional period ends, ~83% of CASPs still unlicensed

As of July 1, crypto-asset service providers without full MiCA authorisation can no longer legally serve EU clients; only 244 firms held full authorization, facing fines up to 12.5% of global turnover if non-compliant.

Elliptic / Helms Advisory

Stablecoin market cap posts biggest monthly drop since Terra-Luna

Total stablecoin market cap fell \$7.7B in June, with USDT dropping from \$190B to ~\$184B and USDC from \$80B to ~\$73B since March; analysts see no cause for panic yet.

HACKING & SECURITY INCIDENTS

Bonzo Lend loses \$9M in oracle exploit

The Hedera-based lending protocol paused operations on July 11 after an oracle manipulation exploit drained roughly \$9 million.

NFT Plazas

BonkDAO governance attack drains \$20M treasury

An attacker spent \$4.4M to buy just over 1% of BONK supply, met quorum, and pushed a malicious proposal through with 99.9% "yes" votes on July 6-7, draining the DAO treasury; Upbit suspended BONK withdrawals as a precaution.

CoinDesk / The Record

Summer.fi hit for \$6M in flash-loan exploit

PeckShield confirmed the DeFi protocol lost \$6M in DAI on July 6; security firm Blockaid said funds were drained before warnings reached users.
