

Total stablecoin market cap sits at \$286.9B (Aug 2), down from March's record \$320B, even as Circle's Q2 revenue beat expectations.

STABLECOIN NEWS

US regulators miss GENIUS Act's one-year rulemaking deadline

The Fed, OCC, FDIC, NCUA and Treasury all failed to finalize stablecoin rules by the July 18 statutory deadline, leaving issuers without a clear compliance framework into at least H2 2026.

Crypto Briefing

Circle beats on USDC growth despite Q2 revenue miss

Circle posted \$701M in Q2 revenue (vs. \$713M est.) but shares jumped 7.4% as USDC supply grew 19% to roughly \$72B; its Arc blockchain is set for public launch September 16.

AMBCrypto

Standard Chartered-backed HKDAP stablecoin eyes August launch

Anchorpoint plans to roll out its Hong Kong dollar stablecoin this month for cross-border payments and tokenized assets, distributed B2B2C through approved partners.

HACKING & SECURITY INCIDENTS

Coldcard hardware wallet exploit tops \$116M and climbing

A 5-year-old firmware flaw in Coinkite's Coldcard weakened key randomness, letting attackers drain over 5,200 Bitcoin addresses since July 30 in four waves — the third-largest hack of 2026.

TRM Labs / Fortune

Three DeFi bridges drained for \$35.6M in a single day

AFX's Arbitrum bridge lost \$24.2M in USDC to a validator-signature compromise, while BSquared (\$3.9M) and VerusCoin (\$7.5M, via a reused bug) were hit the same day; VerusCoin funds moved to Tornado Cash.

Coinpedia

Weak-RNG bug in CryptoJS drains \$5.7M across five wallet apps

A flawed random-number implementation in the widely used CryptoJS library exposed private keys in multiple wallet apps, adding to a first-half 2026 total of \$1.1B lost to phishing and wallet-drain attacks.
