

Open USD (OUSD) — a new dollar stablecoin backed by 140+ firms including Stripe, Visa, Mastercard, and BlackRock — went live on Solana this week, one of the biggest challenges yet to Tether and Circle's dominance.

STABLECOIN NEWS

Stripe, Visa, Mastercard, BlackRock launch rival stablecoin Open USD

A coalition of 140+ banks and fintechs launched Open USD (OUSD) on Solana, passing reserve yield back to businesses that mint and hold the token rather than keeping it as issuer profit.

HACKING & SECURITY INCIDENTS

KelpDAO exploit hits \$294M, among 2026's largest

Investigators describe the KelpDAO breach as a sophisticated, state-directed operation exploiting infrastructure rather than a simple smart-contract bug.

CryptoPotato

Drift Protocol breach drains roughly \$285M

TRM Labs attributes the Drift Protocol loss to an infrastructure compromise; combined with KelpDAO, the two incidents account for nearly 59% of all H1 2026 crypto theft.

Crowdfund Insider

North Korea-linked groups tied to 66% of H1 2026 crypto theft

Crypto hacks hit record frequency in H1 2026, though total losses stayed just under \$1B; DPRK-linked actors are estimated behind roughly \$643M of that total.

Crowdfund Insider

Coordinated attack drains 100+ EVM wallets for \$107K

A mysterious, automated attack swept across EVM-compatible chains, draining small amounts from over 100 wallets in a pattern researchers are still tracing.
