Tether Delisted From Regulated EU Markets as MiCA Bites

USDT was pulled from regulated European exchanges after Tether chose not to pursue a MiCA license; rival Circle secured approval and is expanding its euro-denominated USDC business.

DL News / Payment Expert

USDC Overtakes USDT in Transaction Volume

Circle's USDC accounted for roughly 70% of adjusted stablecoin transaction volume in H1 2026 versus ~25% for Tether, even though USDT still leads on total market cap after posting a \$1.5B Q2 profit.

Stablecoin Supply Posts Biggest Drop Since Terra

Total stablecoin supply shed about \$15B, the sharpest contraction since the Terra collapse; analysts attribute it to liquidity rotation rather than panic.
