

Stablecoin supply has shed \$15B since May, 2026's biggest decline since Terra's collapse, as GENIUS Act interest bans push cash into tokenized Treasuries.

STABLECOIN NEWS

Stablecoin supply posts biggest drop since Terra

Total supply fell over \$15B from a mid-May peak of \$322B as GENIUS Act rules barring yield on payment stablecoins pushed cash into tokenized Treasuries. USDT and USDC absorbed most of the decline.

Tether and Circle battle for share as new rival emerges

Circle's Arc chain is moving to proof-of-stake and courting institutions, while Stripe, Visa, BlackRock and 140+ firms back a new rival, Open USD (OUSD); Circle shares fell 13% on the news.

CoinGeek / Fortune

Tether's USAT grows but still trails USDC, PYUSD, RLUSD

Tether's US-focused stablecoin USAT is scaling for institutional treasury and settlement use, but remains far smaller than Circle's ~\$72B USDC and other regulated rivals.

HACKING & SECURITY INCIDENTS

Coldcard hardware wallet flaw drains \$116M in BTC

A 2021 firmware bug routed seed generation to a predictable software RNG instead of the hardware RNG; attackers have swept over 4,500 wallets in successive waves since July 30. Coinkite has shipped emergency firmware.

Bloomberg / Fortune

Ethereum phishing scam drains nearly \$1M from a single wallet

A targeted phishing attack tricked a victim into signing a malicious transaction, draining close to \$1M in ETH-based assets in one hit.

KelpDAO's \$292M LayerZero bridge hack still reverberating

The April cross-chain exploit, linked to North Korea's Lazarus Group, triggered a \$9B panic withdrawal from Aave after attackers used stolen funds as loan collateral, exposing systemic DeFi contagion risk.

Bloomberg

H1 2026 sets record for crypto hack frequency

Q2 2026 logged roughly 70 separate exploits, the most-hacked quarter on record, though total losses stayed below \$1B as recovery efforts improved.
