## HACKING & SECURITY INCIDENTS

### KelpDAO Exploit Ranks as 2026's Biggest Hack So Far

Attackers drained roughly \$294M from KelpDAO in a sophisticated, state-directed operation involving infrastructure compromise rather than a simple contract bug, per TRM Labs.

CryptoPotato

### Drift Protocol Breach Adds ~\$285M to 2026 Losses

A separate exploit hit Solana-based Drift Protocol for approximately \$285M, reinforcing 2026's trend toward large, coordinated DeFi attacks over opportunistic bugs.

DeFi Hacks 2026 report (Altfin/CCN)

### North Korea-Linked Groups Behind 66% of H1 2026 Hack Losses

Crypto hacks hit record frequency in H1 2026, but total losses fell below \$1B; North Korean-linked actors are tied to roughly \$643M of that total, per TRM Labs.
