

Stablecoin market cap sits near \$287-310B even as U.S. regulators missed the GENIUS Act's July 18 rule-finalization deadline, leaving issuers in limbo through August comment periods.

STABLECOIN NEWS

GENIUS Act rules miss deadline, stablecoin uncertainty extends

Treasury, OCC, Fed, FDIC and NCUA all missed the July 18 deadline to finalize implementing rules, leaving the \$310B stablecoin market under an incomplete federal framework. Comment periods run into August (FDIC through Aug 4, five-agency CIP through Aug 21).

HACKING & SECURITY INCIDENTS

Coldcard hardware wallet exploit tops \$130M

A five-year-old firmware flaw let attackers reconstruct Bitcoin seed keys, draining 1,800+ BTC across 5,200+ addresses since July 30 in multiple waves. Coinkite issued an emergency patch and urged anyone who generated a seed since March 2021 to migrate funds.

\$35M drained in coordinated attacks on three protocols

AFX's Arbitrum bridge (\$24.15M), the Verus-Ethereum bridge (\$7.54M, its second hack this year) and B2's staking contract (\$3.86M) were each hit within a six-hour window on July 22-23.

CoinDesk

\$290M Kelp DAO/LayerZero bridge hack sparked \$9B Aave panic

The largest DeFi exploit of 2026 so far drained 116,500 rsETH from a LayerZero-built cross-chain bridge, triggering contagion fears that pushed investors to pull roughly \$9B from Aave.

Bloomberg

2026 crypto hack losses near \$1.2B across 276 incidents

CertiK's mid-year tally shows fewer but far more surgical hacks in 2026, with attackers increasingly targeting admin keys and off-chain infrastructure rather than smart contract code itself.
