

Stablecoin supply has fallen \$10B from its May peak as USDT and USDC contracted amid the broader market selloff, even as the GENIUS Act's July 18 rulemaking deadline passed with no federal agency issuing final rules.

STABLECOIN NEWS

GENIUS Act Rulemaking Deadline Passes Without Final Rules

The six federal agencies tasked with finalizing capital, reserve, and licensing rules for USDC and USAT issuers missed their July 18 deadline, with several still in public comment. Markets are treating it as a checkpoint, not a resolution.

Stablecoin Supply Contracts \$10B From May Peak

USDT and USDC both shrank as the wider crypto market slid roughly 3% this cycle, though stablecoins have outperformed major Layer-1 tokens like ETH and SOL, which are down about 45%.
