HACKING & SECURITY INCIDENTS

BONK DAO governance hijack drains \$20M

On July 6 an attacker bought voting power and pushed through malicious proposal BIP #76, draining ~5% of BONK's total token supply from the community treasury.

Bloomingbit

KelpDAO exploit among H1's biggest at \$294M

The KelpDAO breach ranks as one of the two largest crypto hacks of H1 2026, together with the Drift Protocol hack accounting for nearly 59% of all funds stolen this year.

CryptoPotato

Same-block backrun extraction costs trader \$2M

GoPlus Security flagged a same-block price-discrepancy exploit where a trader swapping 1,126 ETH received a fraction of the expected token value.

KuCoin

Crypto hack count hits record high in H1 2026

Incident frequency reached a record in H1 2026, though total losses fell sharply below \$1B, suggesting smaller average payouts per attack.
